

TELL WHERE WE GET OUR MOCHA

Department of Agriculture Issues
Circular of Information
on Subject

Times-Dispatch Bureau,
Munsey Building,
Washington, D. C., May 2.

The Board of Food and Drug Inspectors, Department of Agriculture, has just decided what the term "Mocha" shall mean when applied to coffee. The board holds in a decision just rendered that the term "Mocha," as applied to coffee, shall be restricted to coffee grown in that part of Arabia, north and east of Hodeidah, known as Yemen. Because of the commercial value of the true Mocha bean it became necessary for the board, acting under the pure food law, to indicate the restrictions which should be placed upon the coffees put on the market and sold under the name of "Mocha." After fully considering the matter and corresponding with the consular agent of the United States at Aden, the board decided as stated above. The consular agent in his letter discusses Mocha coffee in an interesting way. He says: "The Mocha coffee is produced in that district of Southern Arabia known as 'Yemen.' The latter is a strip of territory commencing at a point on the Red Sea, a little north of the port of Hodeidah, and extending first southeast to the Strait of Bab-el-Mandeb and then east nearly to Aden. Yemen is, with the exception of a narrow fringe of land along the Red Sea and the Gulf of Aden, rugged and mountainous, embracing innumerable small, elevated valleys of high fertility which are irrigated by water from the mountains. This is the coffee district of Arabia.

"The term 'Mocha' was bestowed upon 'Yemen' coffee early in the last century, when Mocha was the port from which all Arabian coffee was shipped. The formation of the modern harbors in the Red Sea off Mocha, practically barring out all shipping, caused the port to be abandoned, and its trade went to Hodeidah and Aden, the bulk of it going to the latter place.

"As all of the coffee raised in Yemen may properly be called Mocha coffee, all coffee shipped from the port of Hodeidah comes within such classification. With regard to that exported from Aden, however, the case is somewhat different. There is a coffee grown in the upland regions of Abyssinia, in the vicinity of Addis Ababa, which is known locally and to the coffee trade of the world as 'Longberry' or 'Harrar.' In contrast with that of Mocha, which is sometimes called the 'Shortberry,' The colors of both coffees are practically the same, but the Abyssinian product has a raw, rank, leathery odor, while that of the berry grown in Arabia is delicate and agreeable. The Harrar berry is much longer than the Mocha one, besides being much less regular in form.

"While a considerable quantity of Abyssinian coffee is brought to Aden for shipment to Europe and to the United States, it is doubtful whether very little of it, if any, is exported as being Mocha coffee, the local merchants as a rule dealing in both grades of coffee and being very careful of the reputation of their houses. In Aden the only way in which a dishonest dealer might adulterate Mocha coffee would be by mixing it with the Abyssinian article. Such a proceeding would be at best but a clumsy fraud and would be readily and rapidly detected. It is safe to say that practically all of the coffees shipped directly from Hodeidah or Aden to the United States and labeled 'Mocha' are pure and unadulterated."

FILE NEW TARIFFS PUTTING UP RATES

Railroads in Southeastern Territory to Increase Charges on Fresh Meats June 1st.

WASHINGTON, May 2.—It appears likely that the anticipated increase in railroad freight rates is about to be made. A few days ago a number of the interstate commerce commission expressed the opinion that within three or four months unless a decided improvement in railway conditions should take place it probably would be necessary for the carriers either to increase freight rates or to reduce the wages of their employees. The commission, however, officially, the commission, repeated the taking of either horn of the dilemma by the railroads, but he believed it to be

inevitable that one or the other course would be taken. Sooner than was expected, action looking to an increase in freight rates has been taken by the railroads of the southeastern territory have filed with the interstate tariffs, effective June 1st, increasing their freight rates on fresh meats materially.

The proposed rates will effect all fresh meats shipped into the southeastern territory from the North and West. The new rates will take effect at Ohio river and Mississippi river crossings, including Memphis, Tenn., and will be effective in all parts of what is known as the Carolina territory, that is the section of the country east of Asheville, N. C., and south of Danville, Va. The increase will amount to from 3 cents to 10 cents per hundred pounds on all fresh meats. It is the first material raise in the rates on foodstuffs made by the railroads of the country for a good many years.

It will mean much to the consumers, as it probably will result in an increase of approximately 1 cent a pound on low grades of meats and perhaps as much as 2 cents on the select cuts. While the increase to the consumer in the territory affected by the proposed rates is noticeable, it is likely that it is intended as a device to force the carriers to a view to making a general raise in rates on all commodities. It is conceded by the experts of railroads that many of the carriers are in a comparatively low state in force are comparatively low, and it is regarded by those who follow the industry that, in view of the increased cost of railway equipment and of railway employees, it is necessary to increase some of the freight rates.

New Industries In The South

CHATTANOOGA, TENN., May 2.—Big figures are employed in describing the value of new industries established in the South during the week ending today. The following are a few of the new industries, and is compiled from reports made from day to day.

Among the heavily capitalized new concerns, as shown by the Tradesman's list, may be mentioned a \$500,000 coal and coke company, a \$500,000 mining company, and a \$200,000 lumber company in West Virginia; a \$100,000 brick company and a \$100,000 light power and ice company in Florida; a \$200,000 investment company in Georgia; two telephone companies in Kentucky; a \$5,000,000 lumber company in Louisiana; a \$100,000 building and loan company in Mississippi; a \$100,000 tinneed meat company in Missouri; two lumber companies and a carriage factory in North Carolina; a \$100,000 oil mill in Oklahoma; an electric light and power plant in Tennessee; a \$300,000 warehouse company in Virginia.

The Tradesman's list for the week is as follows:

Alabama.
Montgomery—Development company. Silverhill—\$500,000 development company.
Kentucky.
Beaver Dam—\$550,000 creamery. Boston—\$150,000 mill company. Champaign—\$50,000 milling company. Louisville—\$100,000 lumber company. Falmouth—\$100,000 lumber company. Monticello—\$300,000 gas company. Pineville—Mines. Sneed—Telephone company. Stephensport—Telephone company.
North Carolina.
Asheville—Coal and lumber company. Chapel Hill—\$150,000 land company. Newbern—Carriage factory. Raleigh—Lumber company. Winston-Salem—\$75,000 bottling works.
Oklahoma.
Claremore—\$100,000 oil and gas company. Guthrie—\$200,000 gin and investment company. Muskogee—\$100,000 laundry. Muskogee—\$100,000 development company. Snyder—\$100,000 oil mill. Weatherford—Telephone company.
Tennessee.
Huntington—Ice factory. Knoxville—\$100,000 marble company. Lewisburg—\$100,000 electric light and power plants. Dumas—\$150,000 light and power company. Knoxville—\$100,000 tobacco company. Norfolk—\$150,000 supply company. Portsmouth—\$100,000 distillery. Richmond—\$300,000 warehouse company. Wytheville—\$100,000 mining company.
West Virginia.
Charleston—\$500,000 glass factory. Elkins—\$250,000 lumber company. McConaughy—\$500,000 mining company. Morgantown—\$500,000 coal and coke company. Parkersburg—\$200,000 lumber company.

A VIRGINIA ASSET: WEALTH IN WATER

From Her Soil Come All Kinds of Wealth—Mecklenburg County Leads.

CHASE CITY, VA., May 2.—"Great streams from little fountains flow," is well illustrated in the volume of mineral water business now carried on here from an insignificant beginning.

Twenty years ago the writer of this prepared the first pamphlet ever published about the mineral water discovery to the community to all who wished it. Reports multiplied of the curative results from its use. The incredulous were amazed at the fountain of health, and ridicule changed to praise and belief. It was with much difficulty that any city druggist would take it on consignment, or even to give away for experimental purposes. Mr. R. W. Powers, of Richmond, was the first who would even receive it for free distribution. He did not like the name of "Chloride Calcium," and wished another substituted. But this was not done. Now, after twenty years of vicissitudes and change of ownership, the extent of use and sales are only limited by the capacity of springs to furnish the waters.

The water is shipped to distant States and in the preparation of it for shipment employment has to be given to many workmen; many thousands of dollars have to come here in payment for the water, and it is distributed here, and thus the whole community, indeed the whole State, is benefited by the development of this water industry, for it is an industry. The development of any of Virginia's hidden wealth and the turning of it into cash and placing it where it benefits humanity is an industry.

Truly, old Virginia is a rich State; rich in timber, rich in her land, rich in the products from the same, rich in granite and mineral deposits, and even rich in the waters that flow from her hillsides and from the bowels of that part of the State, and it is part of Virginia is richer in these things than Mecklenburg county.

HAD GOOD FISHING STREAM

Large Catches at the Shores in Stafford and Other Counties.

LEESBURG, VA., May 2.—The fishing season, which means much to the people of Stafford and the surrounding counties, is now over. Stafford's two largest shores, situated on the Potomac River, have been very successful in their catch this season, and in consequence fish have sold for a moderate price. Five dollars per thousand for corned shiners on the shore is not a considered exorbitant. Marlborough has "cut out." Widewater is still in operation. This has been and still is a very valuable shore, yielding large quantities of fish. This shore, situated near the station by the same name, on the R. F. & P. R. R., is a favorite resort for picnickers from far and near. Its splendid beach renders it all the more attractive because of its bathing facilities.

The farmers of this section will be very much disappointed if the Roberts Tomato Canning Factory, of Fredericksburg, fails to run. Many of them have already prepared the land for the crop. Nearly all of the farmers around here are truckers in a small way, tomatoes, pickles, sweet and Irish potatoes, watermelons, cantaloupes and garden stuff being raised and marketed. Most of the early fruit has been killed. Smallpox is gradually dying out, one or two places being under quarantine.

To Build Handsome Home.
(Special to The Times-Dispatch.)
SPOTSVYLVANIA, VA., May 2.—Mr. E. G. Hoffman, architect and builder, of Fredericksburg, Va., has contracted with Mr. Thomas Stokely Coleman, the Commonwealth's attorney of this county, to build for him a beautiful residence of modern style, to cost about \$150,000. The workmen have begun the laying of the foundation, and in a short time a beautiful superstructure will arise therefrom. This will be quite an addition and ornament to the town.

SUGAR REFINERY AT NEW ORLEANS

Millions of Dollars Being Spent on This Plant and Other Extensive Enterprises.

(Special to The Times-Dispatch.)
BALTIMORE, May 2.—In editorial correspondence from New Orleans the Manufacturers' Record this week calls attention to the active work which is under way on many important enterprises financed prior to the recent financial depression, as indicative of the spirit of advancement which is seen throughout the South. One of the greatest industrial enterprises now under construction in the South is the immense sugar refinery being built at New Orleans by the American Sugar Refining Company, at a cost of several million dollars, to have a capacity of 12,000 barrels of sugar a day, which would mean an aggregate output yearly to the value of about \$50,000,000. The main building, fourteen stories high, forms at present a splendid background for the half a dozen or more

other great buildings being raised between it and the water-front, along which is a splendid wharf about 1,000 feet long and two stories high, also under construction.

It is proposed that this refinery shall supply the sugar trade of much of the West and Northwest, thus adding to the sugar interests of Louisiana a great refining business based on foreign sugars, which will be imported in large quantities for this great plant.

A few yards away from the refinery, whose site is between New Orleans and Port Chalmette, the Frisco System and the Southern Railway are completing their large wharves and docks, including a ship, which is really a great basin, at right angles with the Mississippi River, to the depth of forty feet and sufficiently large to furnish loading room for six of the longest ocean steamers at the same time and wide enough to permit any one of them to turn within it. The wharves on the ship are iron-bridge construction and two stories high.

New Orleans is also expending upon the construction of new hotels and the enlargement of existing ones about \$5,000,000. But probably the most important and far-reaching work which is under way in Louisiana is the reclamation of overflowed or wet prairie land, of which several hundred thousand acres have recently been sold to large land operators from the West.

Railroad contractors finding no em-

ployment for their equipment in railroad construction work, are turning their attention to the reclamation, on contract or for investment, of large areas of overflowed land. As Louisiana

has about 7,000,000 acres of land of this character, which reclaimed at a cost of about \$5 an acre, would, it is estimated, be immediately worth more than \$100 an acre, there is regarded a foundation for wealth as great as even the coal and iron of Alabama, for when reclaimed and put under cultivation the 7,000,000 acres would yield annually at least \$500,000,000 or \$600,000,000 worth of cotton, rice, sugar and other farm products. What Louisiana is doing in this direction is setting an example for the whole South in the territory of which it is estimated there are 50,000,000 acres of land available for reclamation which, when reclaimed and made ready for the plow, would be worth \$5,000,000,000.

North Carolina Chapters.
(Special to The Times-Dispatch.)

RALEIGH, N. C., May 2.—Two new enterprises received charters to-day. Mayo Brothers Fish and Oyster Company, Vancleave, Pamlico county; capital, \$10,000 authorized and \$1,000 subscribed, by B. G. and H. G. Mayo and J. R. Barbour. The Gunn Veneer and Lumber Company, Rural Hall; capital, \$25,000 authorized and \$2,000 subscribed, by A. M. and T. G. Gunn and P. B. Law.

The August Grocery Company

Why Not Talk It Over

Let us make a cozy, comfortable, artistic home for you—or make the home you already have a little more cozy, comfortable, or artistic. We'll save you money and save you lots of it. This store particularly appeals to those who are inclined to be critical and want the very best. Our goods are goods of character—original and pleasing in design and superior in quality—such furnishings as reflect good taste and judgment. Our prices are right—absolutely the very lowest.

9x12 ft. Kashmir Drugget, \$16.36. You couldn't tell one from a \$35.00 best Body Brussels Drugget.

Three-prong Towel Racks, 5c each.

Four-foot Porch Benches, 49c each.

One lot sample Mattresses; the only thing the matter with them is that they have been handled by customers and are slightly soiled; you save just one-third by buying one of them.

Is made to fill every want. What's the use of buying something cheap when the Alaska will save you enough in your ice bills in one summer to pay for itself? Don't experiment, buy an Alaska. We've sold them for eighteen years and know what they are.

Are the safest and most up-to-date. No dangerous old-fashioned pilot lighters; cook quick-est and use less gas; can cook biscuits in 2 1-2 minutes; prices, \$5.50 up.

CHAS. G. JÜRGENS SON

Right in the Centre of the Furniture District at the Corner of Adams and Broad.
